MS-WL

Wireless motion sensor switch

GENERAL INFORMATION

Light is controlled by the detection of movement. When motion detector senses movement light will turn on and automatically turn off 30 seconds after cessation of movement.

SUPPLY VOLTAGE: 12V DC or 24V DC

OUTPUT: 6 channel

SENSING DISTANCE: approximately 2ft

INDUCTION ANGLE: 30°

MAX SWITCHING CAPACITY: 150W total
(75W per channel)

SUPPLY LEAD: 7"

INSTALLATION: surface or recessed

BATTERY LIFE: Approximately 1 year. The red light indicates that the battery is low. Recharge using a USB-C cable.
